Projects

- **Cost Efficient Home Surveillance System**

This project deals with a design and Implementation of smart surveillance monitoring system. For the system, a Raspberry Pi 3 has been used along with a camera module attached to it. If the unknown person detected it alerts and send the captured image to administrator email.

- **Working basic Analogue Clock using HTML and CSS**

Using the visual Studio code with the extensions of HTML and CSS. we have developed simple and dynamic working analogue clock which can be modified with just simple implementations.

Achievements

- Attained **AWS Academy Cloud Foundations certificate** from AWS Academy.
- Completed 100 days **Python** bootcamp from Udemy.
- Obtained **Core Java** online training from Internshala.
